### **DETAILED ACTION**

1. Claims 11-16, 32-37, and 40-45 are pending.

#### ***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The Specification fails to provide support for the claimed "computer readable medium".

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 11-16, 32-37 and 40-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Referring to exemplary claim 11, it is unclear as to what "the plurality of probabilities" are pertaining to. The Examiner requests clarification of the phrase "the plurality of probabilities" in the claim is interpreted to mean and a limitation explaining the use of a "predecessor" in how the probabilities are calculated. Correction or clarification is requested.

6. Referring to exemplary claim 32, the system is a plurality of "components", however the term "components" has been used as an article of hardware and as a web element in the specification. It is unclear as to what Applicant is attempting to claim.

Furthermore "a component configured to compute associated the content element..." is unclear. Correction is required.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
